

NOVEMBER 2010 NEWSLETTER

Welcome to our second E-Newsletter

NOW YOU CAN PLAY THE SAME SHAFTS AS THE TOUR PRO'S.....

ACCRA on fire on Tour

More than 100 tour pro's from the PGA and European Tours use ACCRA shafts and what they are fitted with, is exactly the same as we fit for you. Straight from the same box, no weight or roundness sorting and no endorsements paid either.

They choose Accra because quite simply, it's the best.

During several years of research, using the World's best players as "guinea pigs", ACCRA engineers found that players of all levels needed a product that got the "new

generation" of golf balls up in the air, with reduced spin, allowing drives to run out.

What they came up with is a line of shafts that provide super low torque, for low spin and stability, but amazingly they were able to combine this with an active tip, which increased club head speed and launch angle, providing the hang time which golfers dream of.

They created a shaft that is super stable, but actually gives you "lots of feel", a novel concept, but one that is not easy to achieve.

If these shafts don't give you the feeling of power and accuracy..... Tennis is always an option !!

In the next issue

- Vouchers for Christmas.
- New products for 2011.
- Get your clubs ready for the start of the new season.
- Golf Ball Fitting.

SPECIAL OFFER.....

.....*ProT Dual Compound grips will be available in all four colourways from now until the end of December at only £4.95 per grip, fitted.*

Get fitted for ACCRA shafts at Designer Golf, one of only 300 official ACCRA Fitting Centres Worldwide.....

INFINITI INTRODUCES A NEW DRIVER

December sees the launch of the new 440cc driver from one of our major suppliers, Infiniti Golf. It is aimed at the better player who prefers a smaller head, providing superior control over the now traditional 460cc heads.

The driver has a cup face design, with a permanent 9 gram weight port at the rear and two side cavities designed to take custom 3 gram medallions if extra swing weight is required and will be available in 9 and 10.5 deg lofts.

With the winter weather now with us, you know how important it is to have good grips on your clubs.

For maximum control and enhanced feel Play Pro T.
